

Sattelite radio is by far the best thing that has come across the air waves since I was introduced to fm when I was ten years old.I'm 47 now, and have heard a lot of garbage from the likes of Howard Stearn,Opie and Anthony,the Radio Chic, just to name a few. Xm radio is now excusively played in my car where it is no more than gratifying to be a able to listen to quality radio without all the "B.S." associated with am/fm. Commercial free weather and headline news is appreciated along with clean mouth dj's and great sounding music.Keep up the good work of removing the trash from am/fm,but leave the XM radio alone.
